Experience

Quivers, Inc., Remote   *April 2022 – August 2023*

UI Engineer

- Delivered new major UI workflows and screens, features, improvements, and bug fixes for a customer-facing SaaS platform product suite
- Collaborated with a small team of in-house engineers and off-shore development team to deliver technically optimized features which offer a Grade A customer experience
- Rapidly delivered new software features and platform enhancements using the full software development lifecycle
- Validated and verified designs & solutions to ensure best customer product fit and maximum edge case coverage

Entech/Anovaa, Malvern, PA   *May 2020 – April 2022*

Software Engineer II

- Developed new and improved existing user interfaces for a variety of features that securely integrate and consume RESTful APIs using React and Material-UI
- Collaborated with product designers to design and create friendly UI/UX for new features
- Developed solutions to add new or improve existing functionality to business logic processes using C#, .NET, and MariaDB
- Worked within a team of developers to define client and system requirements and developed solutions and system designs that will scale to meet future enterprise-level requirements

Software Engineer I

- Utilized knowledge of responsive web development to maintain and update high-traffic websites for external clients using HTML, CSS, C#, .NET, and Microsoft SQL Server
- Created documentation highlighting best development practices/processes for future team members
- Provided training and mentoring to fellow team members and external partners through shadowing and pair programming sessions

Advisor Innovation Labs, Bryn Mawr, PA   *January 2019 – March 2020*
Junior Software Engineer
- Developed solutions enhancing existing features and improved functionality in order to simplify user experience using React, SCSS, MySQL, and Java
- Designed mock-ups in coordination with product managers and other front-end developers
- Led a UI/UX redesign project for an enterprise administration application
